

1) Install Sing-Box:

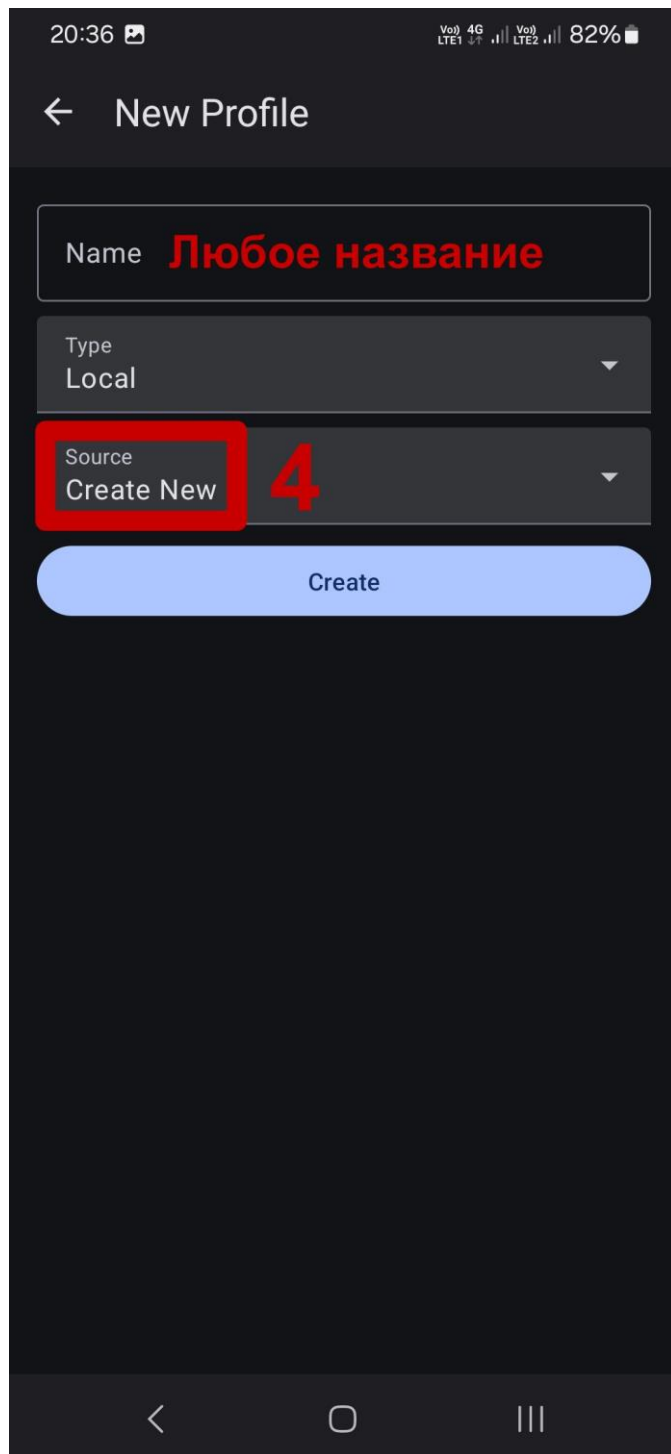

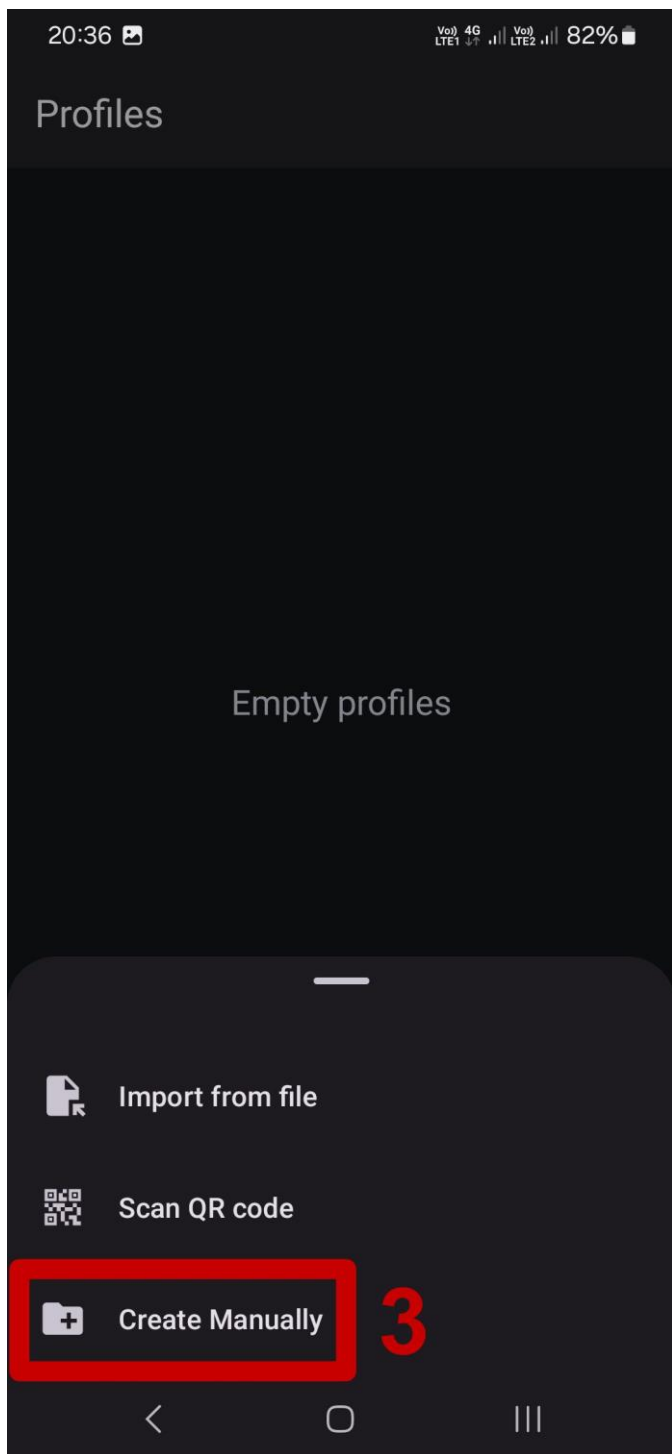

<https://play.google.com/store/apps/details?id=io.nekohasekai.sfa>

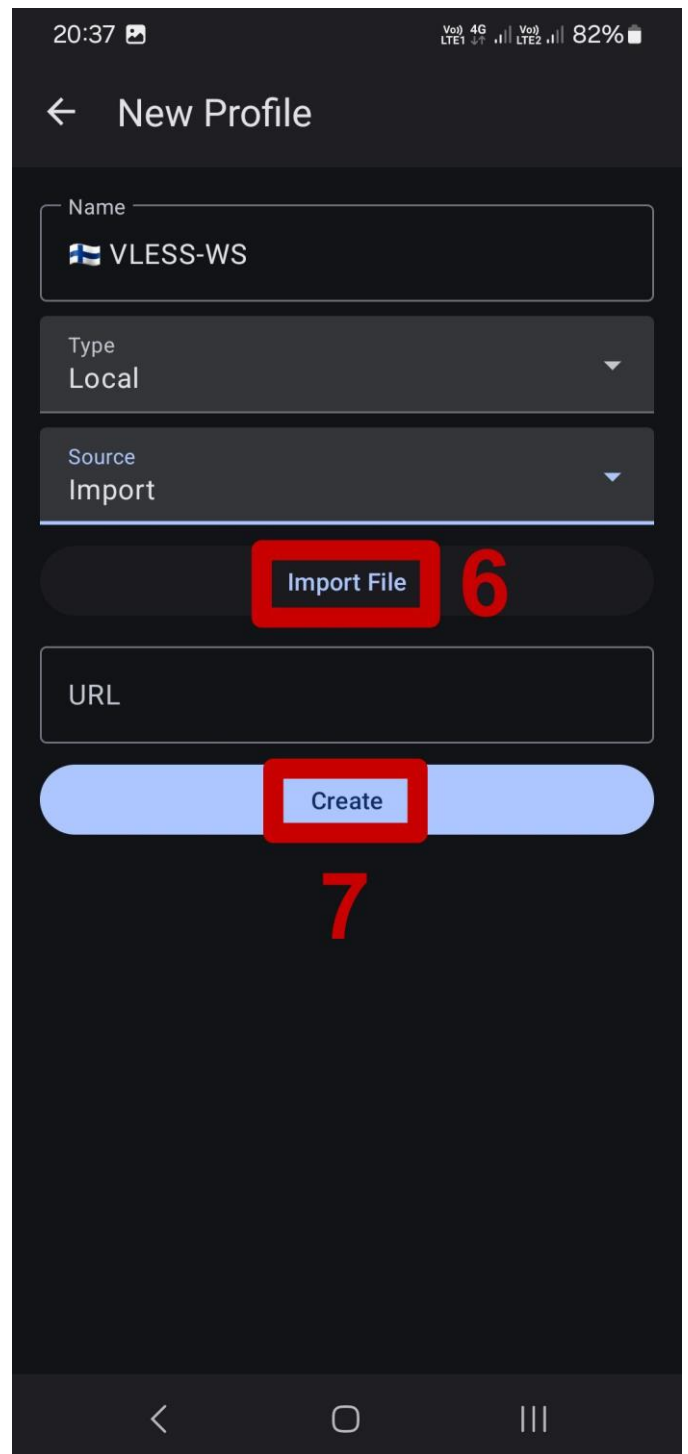

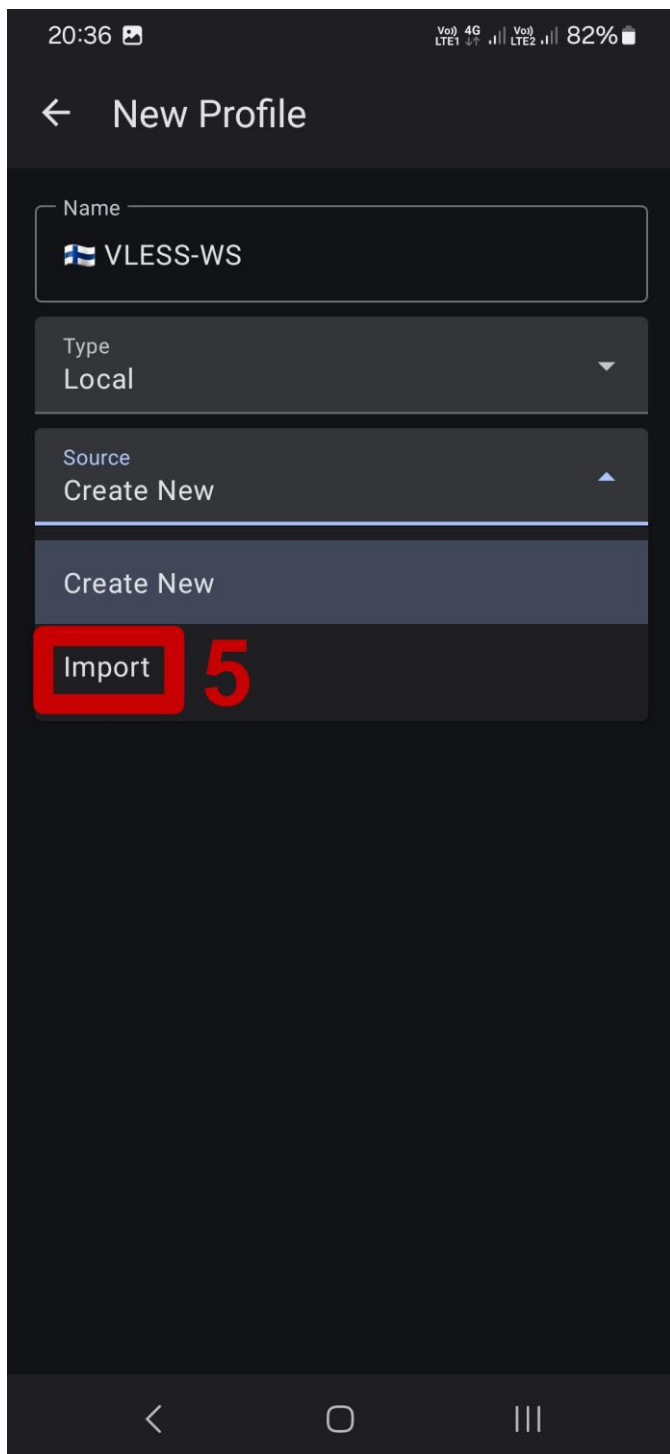

<https://apps.apple.com/us/app/sing-box/id6451272673>

2) Save your client config file to your phone

3) Open Sing-Box app and import the config file:

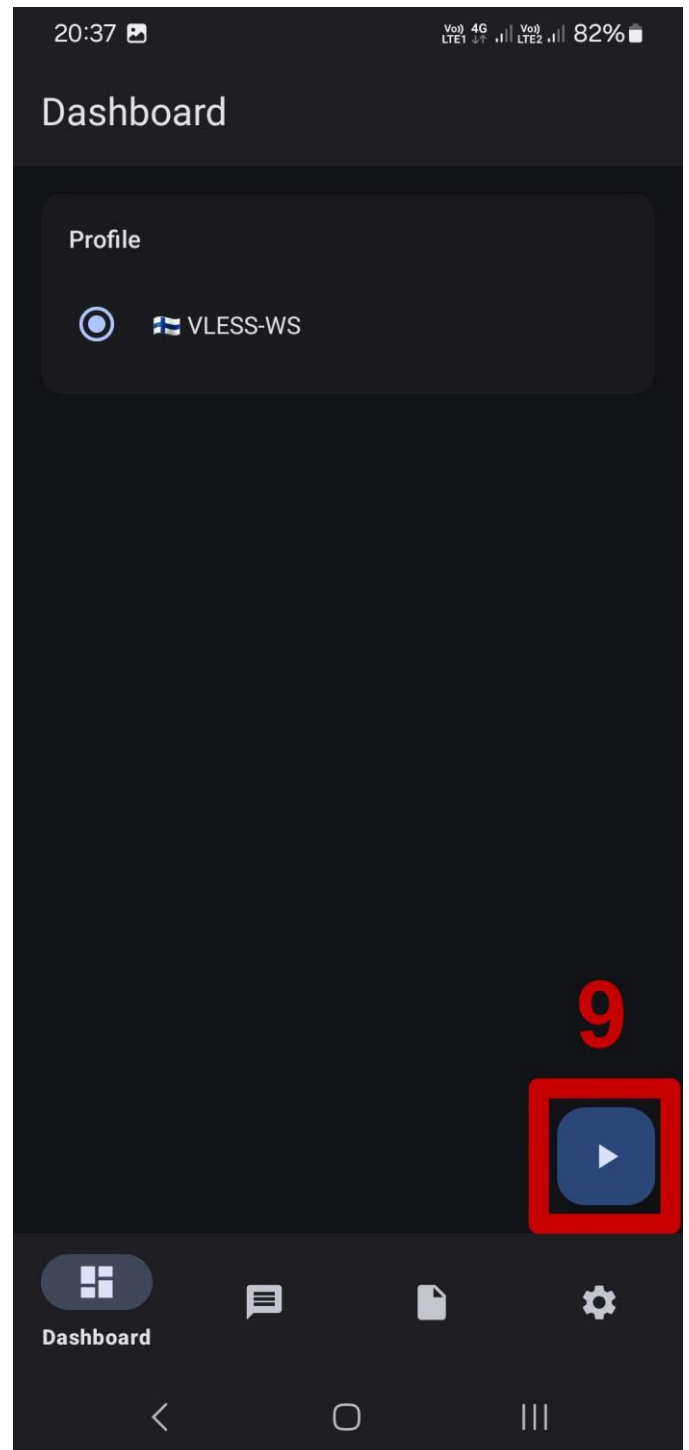

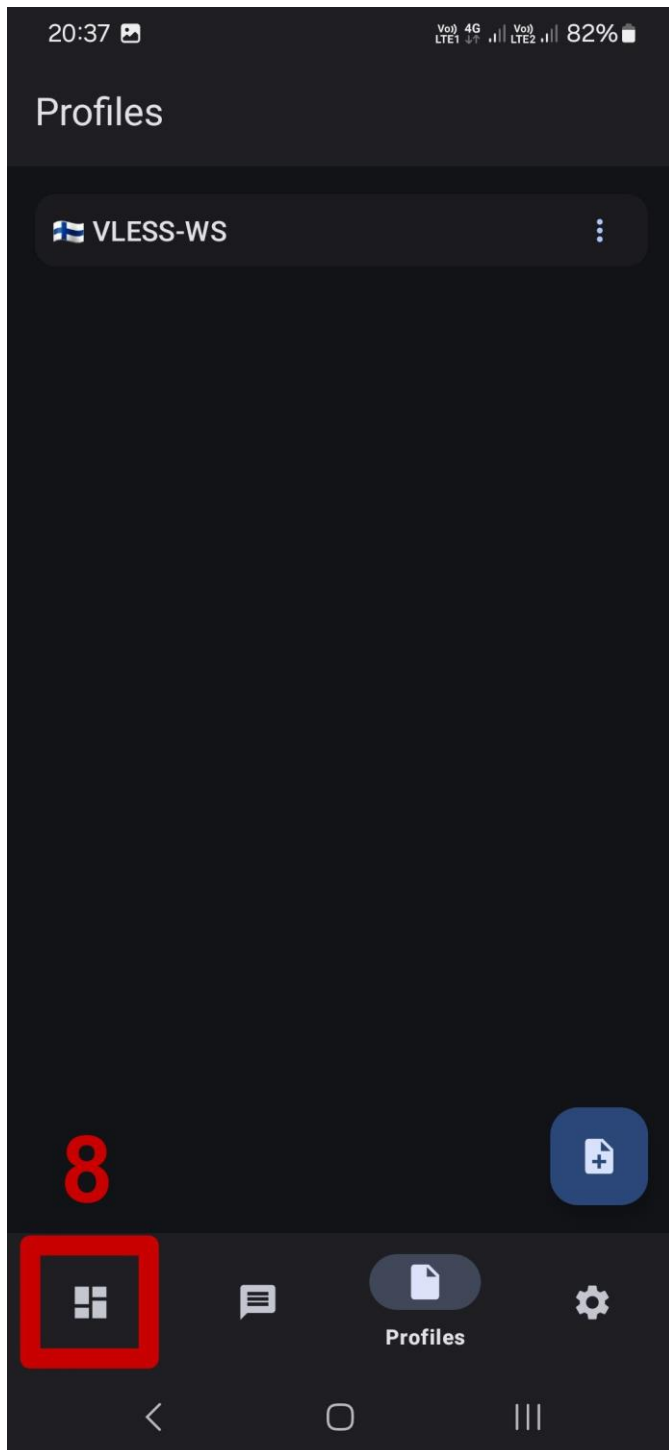

Select your client config file after step 6

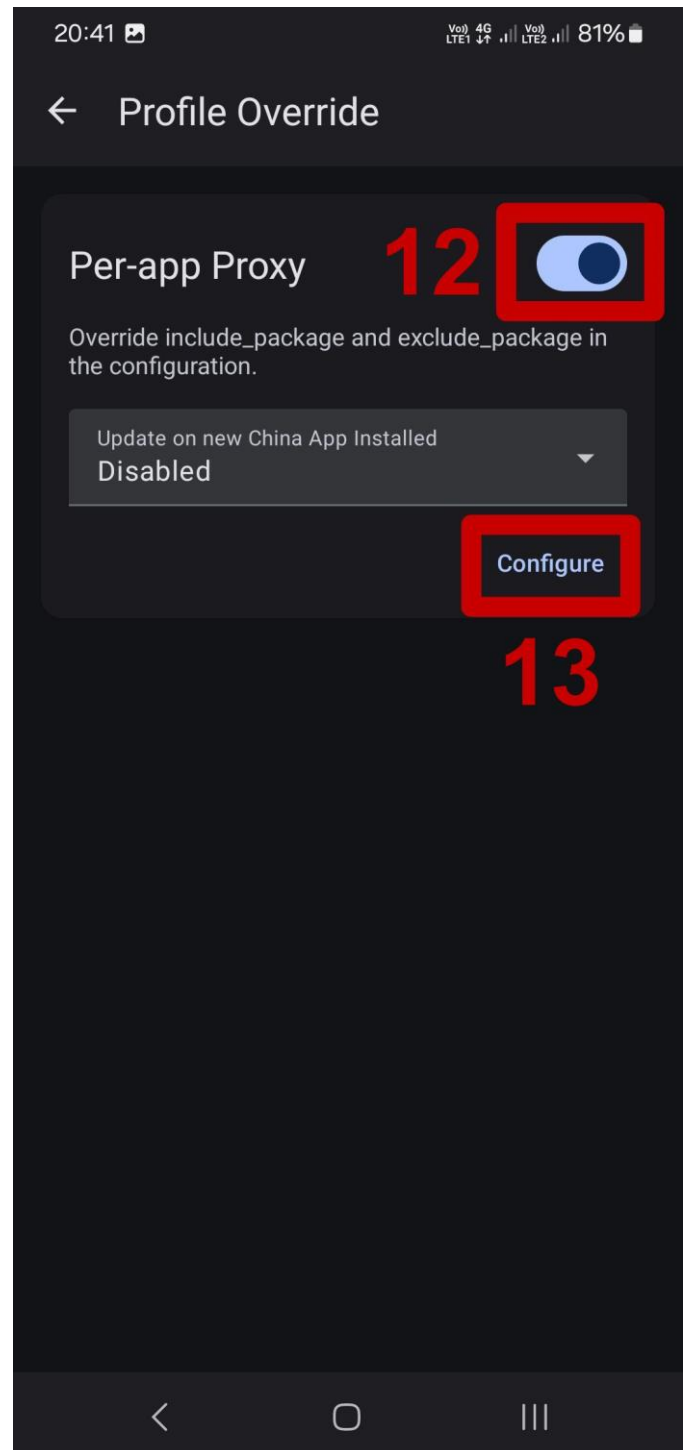

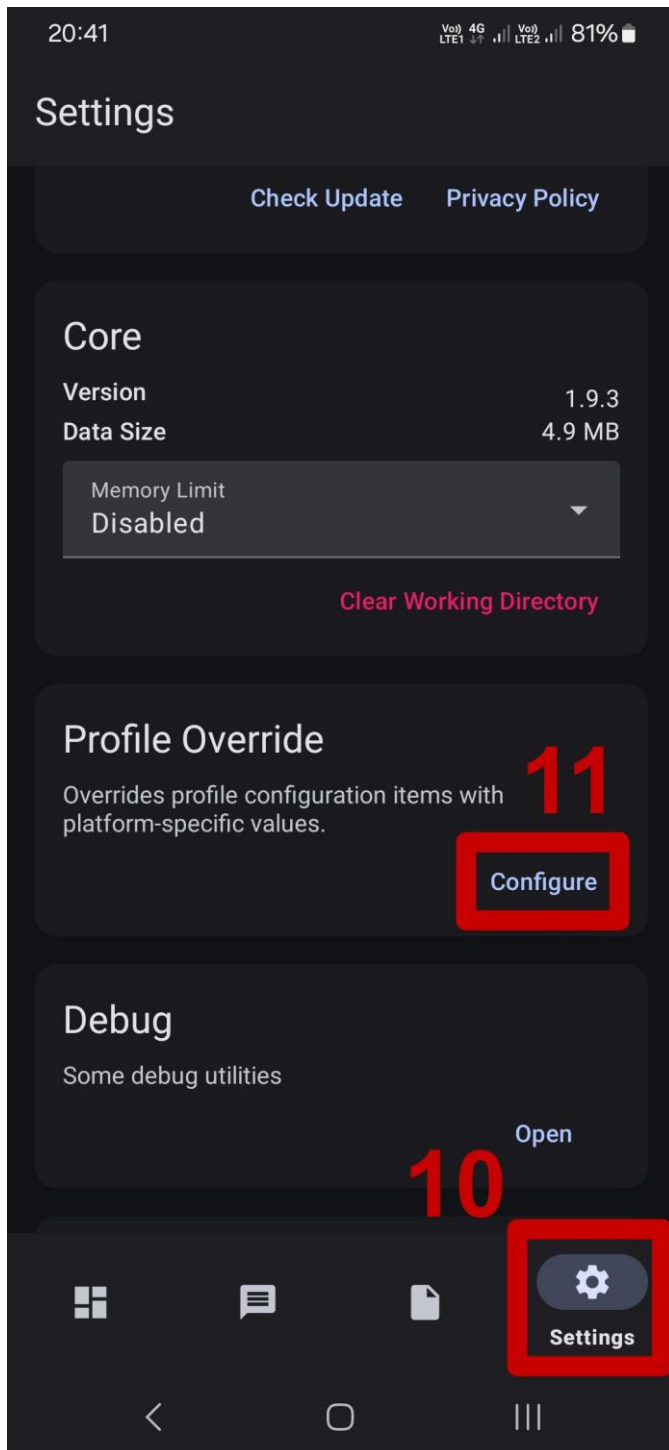

4) Check the connection:

The proxy should work now

But the setup is not complete yet

5) It's strongly recommended to use proxy only for the apps where you need to bypass censorship:

Then click on 3 dots in the upper right corner, select «Proxy Mode», and then select «Include»

After that select the apps

Done!
