1) Install Sing-Box

Press Win + X and open the terminal with admin rights:

Then enter the command:

winget install sing-box

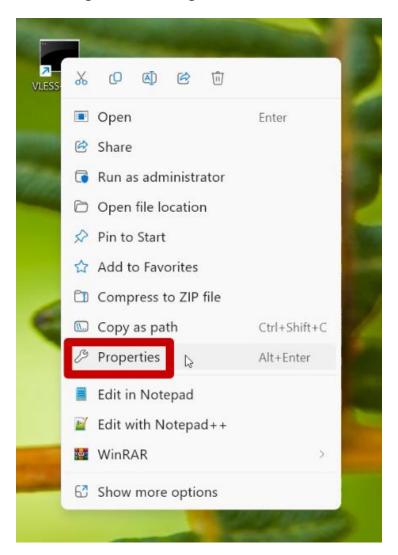

You can close the terminal after the installation is complete

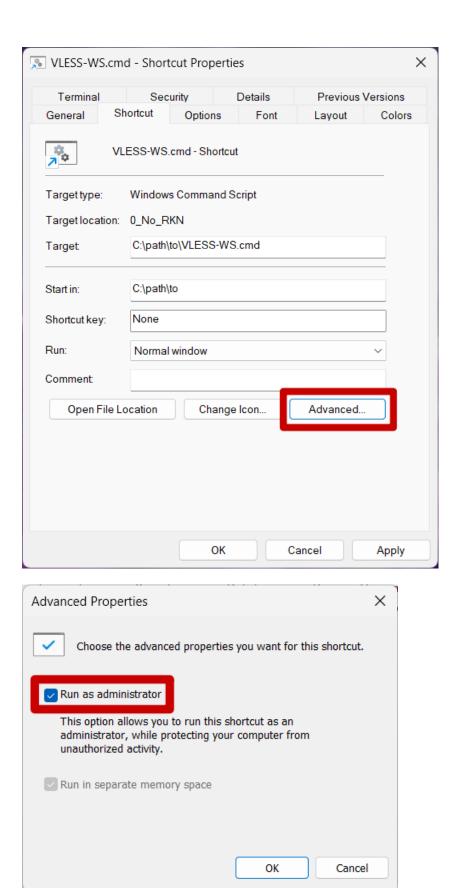

2) Create a .cmd or .bat file with such content:

```
@echo off
echo Started sing-box
echo.
echo Do not close this window while sing-box is running
echo.
echo Press Ctrl + C to disconnect
echo.
if not exist "C:\1-sbconfig\" mkdir C:\1-sbconfig
curl --silent https://domain.com/secret175subscr1pt10n/1-VLESS-WS.json -o C:\1-sbconfig\VLESS-WS.json
sing-box run -c C:\1-sbconfig\VLESS-WS.json
```

Change the link in the 9th line to yours

- 3) Create a shortcut for this .cmd or .bat file
- 4) Change the settings of the shortcut to run it as admin

Then press OK

5) Click on the shortcut to connect to the server

Do not close the terminal window while connected to proxy

To disconnect, click on the terminal window and then press Ctrl + C
